Tahsina Mamun Niha

Student | Aspiring Full-Stack Developer

tahsinamamun10@gmail.com +8801600315677 Narayangonj, Bangladesh

linkedin.com/in/tahsina-niha github.com/tniha10

Motivated Computer Science graduate with hands-on experience in full-stack web development and core software engineering principles. Proven ability to build practical applications using Python and JavaScript and modern frameworks across academic and independent projects. Eager to contribute problem-solving skills and collaborate within dynamic software development teams.

PROFESSIONAL EXPERIENCE

Co-Founder 05/2023 – Present
Crescent Books Dhaka, Bangladesh
1. Direct end-to-end e-commerce operations, order processing, packaging, and dispatch workflows to achieve consistent, on-time customer fulfilment.
2. Manage multi-channel customer communications and brand inquiries, resolving customer issues promptly to maintain high retention and satisfaction.
3. Execute social media marketing campaigns and content schedules to drive online engagement and community growth.

Python Programming Intern 10/2026 – 11/2026
Datheon Remote
1. Selected for the 2026 Engineering Cohort 4-week virtual industrial program focused on project-based software development.
2. Apply artificial intelligence foundations and core algorithms to practical, real-world system integrations.
3. Develop structured, maintainable Python codebases while implementing industry-standard problem-solving and version-control workflows.

EDUCATION

BSc in Computer Science and Engineering 10/2021 – 12/2026
North South University Dhaka, Bangladesh
1. Key Coursework: Data Structures and Algorithms, Database Management Systems, Machine Learning, Artificial Intelligence, Software Engineering.
2. Capstone Project: Built a Flutter mobile application integrating BanglaASR to transcribe Bangla speech, automatically extract CRM fields (Name, Phone, Address, Location, Product Interest), and store lead records in a local database.
3. Undergraduate Research: Conducted research on leakage-controlled evaluation of long-tail correction for hyperspectral image classification using spatially disjoint validation, HybridSN architecture, and class-prior-based logit adjustment.

SKILLS

Programming Languages
Python, JavaScript, TypeScript, PHP

AL & Machine Learning
PyTorch, Deep Learning, Data Analysis, Research Methodologies

Web & Full-Stack Development
React.js, Next.js, HTML5, Tailwind CSS, JSON, Better Auth

Databases & Operations
MongoDB, MySQL, Database Design, Git, E-Commerce Operations

LANGUAGES

- English
- Bangla

PROJECTS

BazarDor 10/2026 – 10/2026
Next.js | React.js | Tailwind CSS | Better Auth | MongoDB
1. Developed a responsive web application designed to track and compare daily commodity and market prices.
2. Built the front-end interface using Next.js, React and Tailwind CSS to ensure fast server-rendering performance and mobile responsiveness.
3. Implemented secure user authentication with Better Auth and integrated MongoDB for dynamic product and price updates.

LTLC - Hyperspectral Image Classification Research 05/2026 – 09/2026
PyTorch | Python | Deep Learning | HybridSN
1. Conducted undergraduate research evaluating long-tail class distributions in hyperspectral image classification.
2. Addressed data leakage by enforcing spatially disjoint training and validation splits across complex datasets.
3. Implemented the HybridSn deep learning model using PyTorch and applied class-prior-based-logit-adjustment to improve classification accuracy for underrepresented classes.

HustleUp 05/2026 – 08/2026
PHP | MySQL | HTML5 | Database Design
1. Engineered a peer-to-peer skill-sharing web platform enabling university students to exchange certified skills and academic support.
2. Structured the relational database schema in MySQL for optimised user queries, session scheduling, and profile tracking.
3. Implemented backend business logic and authentication using native PHP with responsive frontend views.

INTERESTS

Literature & Reading — Avid reader with a keen interest in contemporary fiction, tech essays, and independent publishing, inspired the founding of Crescent Books

COURSES

AI-Driven Full-Stack Web Enginnering 07/2026 – Present
Programming Hero Remote
1. Undergoing intensive training in modern full-stack web development, mastering frontend architectures, backend services and scalable database systems.
2. Integrating AI-assisted workflows, modern authentication frameworks, and API design to build production-grade web applications.
3. Developing end-to-end practical projects emphasising clean code, modular component architecture and modern DevOps/deployment practices.
